

TEXT OF NEW FISCAL NOTES:

FISCAL NOTE: Funds (necessary for the implementation/generated as a result) of this law will come from the _____(department/agency). The implementation of this law will fall under the jurisdiction of _____(department/agency).

FISCAL IMPACT: __#/\$

Fiscal Impact Legend:

= \$100,000 unit of expense

\$ = \$100,000 unit of revenue

Therefore, a 10# bill would cost between \$900,001-\$1,000,000, and a 10\$ bill would create \$900,001-\$1,000,000 of revenue.

If a bill will both cost money to implement as well as generate revenue, the fiscal impact should reflect the overall expense/revenue. That is, if it costs \$600,000 to implement, but creates \$1,400,000 of revenue, the overall fiscal impact would be 8\$ (6# + 14\$ = 8\$).
