BUILDING A TRAUMA INFORMED HOME

A 12 PART SERIES

Are you wondering how to best support a child or youth in your life who has been through profound trauma, such as a serious illness, accident, loss, neglect or violence?

Building a Trauma informed home is a 12 part series with stand-alone sessions that prepare those connected with children and youth to respond to challenges.

WHAT IS CHILD TRAUMA?

Witnessing or experiencing an event that poses a real or perceived threat to the life or well-being of the child or someone close to the child.

This series explores the challenges of caring for and supporting children and youth who have experienced trauma. There will be discussion of various topics such as communication, healthy relationships, youth advocacy and behavior management.

Building a Trauma Informed Home is a great training for current and prospective foster parents, professionals, caregivers, family members and other connected adults of children and youth affected by trauma.
