

CREATING COMMUNITIES WE ALL WANT TO LIVE IN

We change our future for the better when everyone has the opportunity to grow in spirit, mind, and body. When you support the Y, you're investing in young people, particularly those who are farthest from opportunity, which is key to advancing equity and justice and building whole person health for all. As a community-based organization, the Y has a long history of helping support young people and families in living their healthiest lives and reaching their full potential. With the pandemic and social unrest over the past two years, the current impacts and reality for youth is very concerning.

Together, we can support the healing and recovery process from the trauma of the past two years, and beyond, and mitigating both the immediate effects and long-term disruptions to whole person health, well-being, and quality of life for all people.

WHOLE PERSON HEALTH FOCUS AREAS:

YOUTH DEVELOPMENT: When all young people have opportunities to learn, play, and grow, we change our future for the better. Through before and after school programs and camp and outdoor leadership opportunities, we work to foster social and emotional learning, encourage active play, and give kids the opportunity to discover what they love.

CRITICAL NEEDS: When young people have access to food, housing and mental health, we change our future for the better. The Y provides critical wraparound services including food, shelter, counseling, employment training, educational support, and more to young people through the Y Social Impact Center, branches and community locations.

ACCESS FOR ALL: When families have opportunities despite financial barriers, we change our future for the better. To ensure equitable access for all, income-based financial assistance is available for Y branches and programs, so no one is denied access to Y services due to financial barriers.

WHOLE PERSON HEALTH: When communities have access to equitable health and wellness opportunities, we change our future for the better. From personalized wellness plans and disease prevention classes to counseling and health services for under-resourced communities, the Y provides support for building Whole Person Health.

DALE TURNER FAMILY YMCA

COMMUNITIES SERVED:

Shoreline, Edmonds, Lake Forest Park, Seattle, and South Snohomish County

HEALTHY COMMUNITIES START AT THE DALE TURNER FAMILY YMCA

Dad drops off the youngest kids at Kids Corner, then volunteers to coach the Red Falcons - the Y youth basketball league his other two kids play in. Mom uses that me time to take a Y yoga class. As the season progresses, the Red Falcons' skills soar and the bonds of that family — with their community and each other — deepen. They all make new friends along the way, and now see the Y as a hub of comfort and belonging.

That's just the story of one local family finding their Y. There are dozens more. Donors like you make this possible.

Will you contribute to our Annual Fund Drive to keep it going?

Help us reach our goal of: **\$70,000**

We need your help to make programs and services available to all.

- › \$250 provides two young people swim lessons to learn life-saving water skills at the Y.
- › \$600 provides one month of before and after school enrichment for a child.
- › \$1,000 provides one month of localized resources for youth & adults experiencing homelessness and mental health crises.
